Summary

Dynamic and results-driven professional with expertise in frontend development, utilizing React, Next.js, and TypeScript to create modern, scalable, and user-centric web applications. During an internship at Honda Manufacturing Nigeria Limited, I gained invaluable experience in material management and quality control, ensuring efficiency and adherence to industry standards. I exhibited strong mentoring abilities by successfully teaching web development and programming (HTML, CSS, JavaScript, and Scratch) to students at Trybe, integrating technical expertise with effective communication and leadership skills.

Experience

Honda Manufacturing Nigeria Limited | KM 6, Idiroko Road Internship | 06/2024 - 11/2024

- Retrieved and organized motorcycle components, including sprockets, flanges, and tires, for production and assembly lines.
- Inspected motorcycle for quality issues, verified component functionality, and applied finishing touches like chaincase cover caps.
- Transported and organized materials such as battery boxes, crank cases, and panels to support the production process.
- Maintained overall safe work environment with employee training programs and enforcement of safety procedures.

Trybe | Akure, Ondo State Teacher | 02/2023 - 12/2023

- Introduced students to Scratch programming, fostering creativity and logic through interactive projects.
- Taught foundational web development skills, including HTML, CSS, and JavaScript, to primary and secondary school students.
- Organized and assessed projects to measure students' understanding, ensuring concepts were effectively learned.

Skills

Leadership, React js, Nextjs, Firebase, Communication skills, Teaching Experience

Education

Federal University of Technology Akure | Akure, Ondo State Mechanical Engineering | 11/2025
